DETAILED ACTION

ART UNIT DESIGNATION

The Group and/or Art Unit designated for this application has changed. Applicant(s) are hereby informed that future correspondence regarding this application should be directed to Group Art Unit 1631.

OBJECTION BY DRAFTSMAN

Applicant(s) is (are) hereby notified that the required timing for correction of drawings has changed. See the last 6 lines on the sheet, which is attached, entitled "Attachment for PTO-948 (Rev. 03/01 or earlier)". Due to the above notification Applicant is required to submit drawing corrections with the time period set for responding to this Office action. Failure to respond to this requirement may result in abandonment of the instant application or a notice of a failure to fully respond to this Office action.

Claims 1-4, and 6-9 are cancelled as set forth in Paper No. 6, filed 11/21/01. Amended claim 5 and added claims 35-40 are acknowledged.

Applicants' arguments in Paper No. 6, filed 11/21/01, have been fully considered but they are not deemed to be persuasive. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.

Claims herein under examination are claims 5 and 35-40.

Art Unit: 1631

Claims Rejected Under 35 U.S.C. § 112 1st Paragraph

The following is a quotation of the first paragraph of 35 U.S.C. § 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 5 and 35-40 are rejected under 35 U.S.C. § 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

LACK OF WRITTEN DESCRIPTION

Claim 5 and all claims dependent therefrom are rejected. Claim 5 is directed toward a method of using the atom coordinates of the crystal structure of NOVAMYL. There is no disclosure regarding any three-dimensional crystal structure other than an α -amylase having the three-dimensional structure of SEQ ID NO: 2. In response to the amendment to claim 5 applicants have not provided the three-dimensional structure of SEQ ID NO: 1. Applicants have failed to sufficiently describe the claimed invention, in such full, clear, concise, and exact terms that a skilled artisan would recognize applicants were in possession of the claimed invention.

LACK OF ENABLEMENT

Claims 5 and 35-40 are rejected under 35 U.S.C. § 112, first paragraph, because the specification, while being enabling for a method of constructing a variant of an α -amylase using the three-dimensional crystal parent structure of SEQ ID NO: 2, does not reasonably provide enablement for a method of constructing a variant of any α -amylase using any three-dimensional crystal structure of any α -amylase limited only by at least 70% sequence identity to SEQ ID NO:

Art Unit: 1631

1. In response to the amendment to claim 5: "modeling the parent alpha-amylase on the three-dimensional structure of SEQ ID NO: 1 ..." applicants disclosure fails to provide guidance to model the parent on the three-dimensional structure of SEQ ID NO: 1. Guidance is only provided for SEQ ID NO: 2, as previously set forth in Paper No. 4. Therefore, the specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the invention commensurate in scope with these claims.

Claims Rejected Under 35 U.S.C. 112 § 2nd Paragraph

The following is a quotation of the second paragraph of 35 U.S.C. § 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 5 and 35-40 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The rejection is necessitated by amendment in Paper No.6, filed 11/21/01.

VAGUE AND INDEFINITE

Claim 5 (lines 2-3) and all claims dependent therefrom recites "amino acid sequence which is at least 70% identical to SEQ ID NO:1". It is unclear whether applicants' refer to SEQ ID NO: 1 as an amino acid sequence or as a nucleic acid sequence as submitted in the sequence listing (refer to Numeric Identifier <212> DNA). Applicants' will need to clarify for it is unclear.

NECESSITATED BY AMENDMENT

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See M.P.E.P. § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 C.F.R. § 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 C.F.R. § 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

No Claims Are Allowed.

Attachment for PTO-948 (Rev. 03/01, or earlier)
6/18/01

The below text replaces the pre-printed text under the heading, "Information on How to Effect Drawing Changes," on the back of the PTO-948 (Rev. 03/01, or earlier) form.

INFORMATION ON HOW TO EFFECT DRAWING CHANGES

1. Correction of Informalities -- 37 CFR 1.85

New corrected drawings must be filed with the changes incorporated therein. Identifying indicia, if provided, should include the title of the invention, inventor's name, and application number, or docket number (if any) if an application number has not been assigned to the application. If this information is provided, it must be placed on the front of each sheet and centered within the top margin. If corrected drawings are required in a Notice of Allowability (PTOL-37), the new drawings **MUST** be filed within the **THREE MONTH** shortened statutory period set for reply in the Notice of Allowability. Extensions of time may **NOT** be obtained under the provisions of 37 CFR 1.136(a) or (b) for filing the corrected drawings after the mailing of a Notice of Allowability. The drawings should be filed as a separate paper with a transmittal letter addressed to the Official Draftsperson.

2. Corrections other than Informalities Noted by Draftsperson on form PTO-948.

All changes to the drawings, other than informalities noted by the Draftsperson, **MUST** be made in the same manner as above except that, normally, a highlighted (preferably red ink) sketch of the changes to be incorporated into the new drawings **MUST** be approved by the examiner before the application will be allowed. No changes will be permitted to be made, other than correction of informalities, unless the examiner has approved the proposed changes.

Timing of Corrections

Applicant is required to submit the drawing corrections within the time period set in the attached Office communication. See 37 CFR 1.85(a).

Failure to take corrective action within the set period will result in **ABANDONMENT** of the application.
